**Gas expense, 2021-01-29**

We are doing research on gas price strategies for Airnode

https://trello.com/c/PsMcVd2a/10-gas-price-research

Some of this research is based on simulation using past data

https://github.com/sassmilic/historical-gas-prices/tree/master/airnode_simulation

but we also need to validate our findings through live testing on Ethereum mainnet.

https://github.com/sassmilic/historical-gas-prices/tree/master/live-testing

We are asking for **5000 USDC** for this, which will be exchanged for ETH and used in the preliminary experiments.
